

## LONG YEARS AGO

September 18, 1903

It has been reported that certain sections of land East of Didsbury have been purchased at \$2.50 per acre.

Mr. Berscht's shoe store is almost completed and will be open in a short time.

The butter output at the creamery this week was 2000 lbs.

The long-looked-for bridges on the Rosebud and Spring Coulees are in at last.

Mr. Pear expects to have a raising bee this week to erect a house on his ranch east of town.

Mr. Hunter of Ontario is the butter maker at the Neapolis creamery.

Duck shooting is the chief amusement now and a good many are reaping a harvest of ducks.

## RUGBY VICTORY CLUB

The Rugby Victory Club met at the home of Mrs. Annie Krebs on Thursday, September 11th. In spite of the busy season eight members met and tied a large quilt for the Red Cross. Sewing was distributed. It was decided to wait until October to send parcels overseas as so many of the boys are now returning. The next meeting will be held at the home of Mrs. Thompson.

## EVERY GREETING CARD YOU SEND HELPS TO MAKE A BETTER FRIEND

There is no more admirable trait of character than being thoughtful — and there is nothing more thoughtful than sending greeting cards.

In our card department we carry a complete line of Cutts' greeting cards for all occasions. Next time you need a card, come in. You'll find what you want in a jiffy.

## SNOW AND RAIN WILL DELAY HARVESTING FOR NUMBER OF DAYS

## Considerable Grain Still To Be Cut in District

Disagreeable weather has prevailed in the district the past week and has delayed harvesting operations.

Saturday evening a rain storm passed over the district and weather turned cool. Sunday more moisture fell and light snow flurries were in the air. The weather cleared somewhat Sunday night and a fairly heavy frost occurred. Monday night rain and sleet again fell and Tuesday morning the ground was almost white with snow although rain during the morning soon melted the wintry mantle. The wet weather will delay harvesting operations in this district a number of days. Swaths and stocks are thoroughly soaked and with considerable grain still to be cut, particularly west of town, it is feared some damage will result on account of the lateness of the season.

## NOTES FROM THE WEST

The Elkton Willing Workers met at the home of Mrs. Konschuh on Wednesday last, when a quilt was tied. It was decided to hold a special meeting at the home of Mrs. Evans on Thursday, September 27th to quilt and at this meeting it will be decided where to hold the regular meeting, which will be on Tuesday morning, with quite a lot of cutting to be done.

Mrs. O. Krebs and Mrs. A.L. Hogg were Calgary visitors on Saturday, and report Mr. S. Parker was not much improved.

Sgt. E. Lowrie, who was recently moved to Vernon is now to be stationed at Calgary. Mrs. Lowrie and Gladys will remain at Vernon till the end of the month.

## MELVIN NEWS NOTES

The September meeting of the Melvin Red Cross was held at the home of Mrs. Ross Youngs last Thursday. Wash cloths were finished and plans made to do a quilt next month when they meet at Mrs. Henry Fischer's.

We are glad to see Roy Schanz back again and we hear that Sid Summers is on his way home too. Gayle Honey, formerly of Melvin, is on leave at his home in Vancouver, awaiting his discharge from the R.C.A.F.

Dave and Kenneth Janzen are in the district and Mrs. Janzen and the girls are expected to arrive from the west coast this week. They will take up residence in the Hyde house.

Mr. and Mrs. P. Daniels and Neville of Calgary spent the week end at the G. Carlson home.

We are glad to hear that Mr. Luson, who is in the Didsbury hospital, is improving, and hope to see him home again soon.

Mr. and Mrs. Lester Krebs and Verner Wollen visited their uncle, Fred Sanderman at Three Hills on Sunday and brought back crab apples and plums from Sanderman's orchard.

The frame of DuPont's new barn is completed and makes quite an imposing landmark on the west of the ridge. We're all looking forward to the big barn dance promised.

## NOTES FROM THE EAST

The Lone Pine W.I. met at the Lone Pine Hall, there were only eight members and three visitors present, but we had a very nice meeting and accomplished a good deal. The meeting opened by singing "The More We Get Together", in memory of the late Mrs. Wm. McCulloch, it being one of her favorites. Roll call was answered by suggestions for a school lunch. The president read Mrs. Bruce Shiel's paper on Agriculture and Canadian Industries which was very interesting. Mrs. Shiel was not present. Mrs. Schumaker won the 10 cent draw. She then acted as auctioneer and although there were only a few, there was a good bit of bidding, especially on one bag of corn containing about 20 cobs. Mrs. Jenkins had a contest on geography. Winnie Bittner was the winner. The meeting closed with singing "The End of a Perfect Day" and a lovely pot luck lunch was served by the hostess, Mrs. Bittner. Next meeting to be held at the home of Mrs. E. Hunter.

We have three new bridges in the east country now. I suppose we will have dry weather from now on, although it doesn't look much like it today.

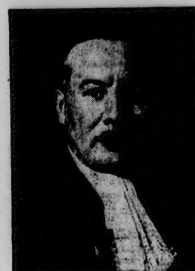

Burnside School was very fortunate to secure a teacher, Mrs. Moore, at such a late date, but we understand for the month of September only, as Mrs. Moore intends to attend the Olds Agricultural school this winter, starting in October. What has become of all the teachers?

Mrs. Krause, the teacher of the Jutland school, for her second year, has a full house this term. There are seven beginners and all the other grades, also three in grade nine.

We, the neighbors of the Jutland and Burnside districts, wish to extend our sympathy to Mr. Hughes and family in their recent bereavement.

Little Marie Simpson returned to the home of Mrs. Bob McCulloch on Wednesday of last week where she will reside and attend the Jutland school.

Mrs. Herget of Calgary is visiting at the home of Mr. and Mrs. Walter McCulloch and is helping her daughter with the household duties as Mrs. McCulloch had a blood poisoning in her hand. We are glad to know that her hand is much improved and hope it will not be too long before she'll be washing dishes again.

HONORABLE THOMAS VIGN, P.C., K.C., vice-chairman of the National Clothing Collection sponsored by the Canadian United Allied Relief Fund, and one of the active workers in organizing the nation-wide campaign, scheduled for October 1-20, for the collection of serviceable used clothing for distribution by U.N.R.R.A. experts among the suffering millions in liberated European countries.

## ERNEST RATZLAFF INJURED WHEN RUN OVER BY TRACTOR

## Expected to Recover From Serious Accident

Ernest Ratzlaff, last year's high school student at the Didsbury school, was in a tractor accident in the Acme district on Tuesday, September 11th, and suffered a fractured skull, and his left shoulder was dislocated, as well as other injuries.

While details of the accident are lacking, a report Tuesday stated that Ernest was now resting easier after being unconscious for some time, and Dr. Fowler of Acme, who is attending the patient, has stated that he has a good chance of recovery.

## MRS. WAYNE FOAT DIES IN DIDSBURY HOSPITAL

Mrs. Wayne (Wilma) Foat, 21, of Carstairs, died Wednesday, September 12th in the Didsbury hospital.

She was born in Sunnyslope and is survived by her husband and infant daughter, Carol Joyce; her parents, Mr. and Mrs. J.J. Falk; one brother, Willard; three sisters, Marion, Doreen and Mrs. H. Foat, all of Carstairs.

Funeral services were held from the M.B.C. church, Didsbury, Friday afternoon at 2 p.m., with Rev. C.J. Hallman officiating, assisted by Rev. Peter Dyck of Cremona. Pallbearers were S. Foat, D. Warren, C. Reed, V. Reed, M. Hughes and J. Bird.

Interment followed in the Carstairs cemetery with Didsbury Funeral Home in charge of arrangements.

## TO RESIGN LIGHT PETITION

The petition circulated this spring about town for presentation to the Wartime Prices and Trade Board in an endeavor to have the domestic light and power rates cut in Didsbury is again being circulated in town for resigning, as there were not sufficient signers on the first list. All those interested in having lower power and light rates are urged to contact Mr. Ed Wiggins and again sign the petition.

## REBECCA ACTIVITIES

Thirteen Rebecas met at the home of Mrs. E. Cogswell on September 12th. During the afternoon the ladies pulled and carded wool which will be made into quilts at future meetings. Mrs. Cogswell served lunch and we adjourned to meet again at the home of Betty Broadhurst on September 26th.

## To Vote on Water and Sewage By-Laws Jan. 21

## OLDS RATEPAYERS VOTE FOR WATER AND SEWAGE BY-LAWS

## Only 12 Ratepayers Vote Against Scheme

Olds ratepayers made history on Monday and the Olds town council were given a clear mandate to make water and sewage plans a reality in Olds when the results of the vote on the various water and sewage by-laws became known, after the polls closed at 7 p.m.

Out of a total of 254 votes cast the results were as follows:

By-law 561—Water By-law—For 241; Against 12; spoiled ballot, 1.

By-law 562—Local Improvement Water—For 241; Against 12; Spoiled ballot, 1.

By-law 563—Sewage By-law—For 242; Against 12.

By-law 564—Local Improvement Sewage—For 241; Against 13.

With water and sewage now in sight in Olds, many people have indicated their desire to settle here. Every expectation that citizens of Olds hoped for with the coming of a water system will become a reality—Olds Gazette.

## MRS. ENOCH HUGHES PASSED AWAY SUNDAY

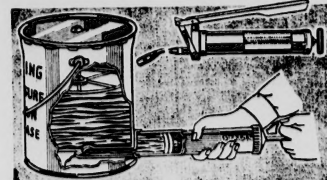

Mrs. Enoch Hughes, 56, a resident of the Didsbury district for the past 20 years, died Sunday in the Didsbury hospital. She was born in Aberystwyth, Wales, and came directly to Didsbury on her arrival in Canada.

Surviving are her husband; four sons, David, Gwilym, Alun and Trevor; three daughters, Mair, Olwen and Mrs. Dave Pratt, all of Didsbury; a granddaughter, two brothers and two sisters in Wales.

Services were held from the Didsbury United Church on Wednesday, Sept. 19th, at 2:30 p.m., with the Rev. D. Whyte Smith officiating. Pallbearers were F. Metz, J. McCulloch, H. Richardson, R. Jenkins, F. Ahlgren and H. Roberts.

Interment followed in the Didsbury cemetery with Didsbury Funeral Home in charge of arrangements.

## A Careful Analysis Would Indicate That There Will Be Plenty Of Jobs For Workers

(By J. W. Edmonds in The Financial Post)

JAPAN'S surrender brings Canada smack up against a problem she has been citing uneasily for nearly six years. Now that the war is over, will there be jobs? Long-term plans, under discussion at the Reconstruction Conference's committee tables, are bound to affect the long-term situation; but to industry and the individual the critical time seems to be now; the next six months.

V-J Day brought news of cancellations of war contracts, prompted many dire warnings in press and radio; V-J Day plus one brought reassuring facts and figures from Reconstruction Minister Howe and Labor Minister Mitchell. To them, to consumers hungry for civilian goods, to industry, thwarted by labor bottlenecks, there seems little reason for current alarm. No one denies that there will be readjustments but calm review of the facts indicates that these readjustments may be of short duration if panic is avoided.

In the first place, reconversion was well under way when the first atomic bomb was dropped. At its peak, the direct war work in Canada involved 1,666,000 wage and salary workers; more than 13% of the total Canadian population 14 years of age and over. But that was back in 1943; by this spring war employment was down to 901,000; after V-E Day it dropped to 620,000. Recently, Reconstruction Minister Howe reported it down to 426,000 with 140,000 urgent jobs going begging. Later figures from NSS Director Arthur MacNamara brought these estimates down to 230,000 war-workers and 100,000 jobs.

There is, as labor authorities point out, no lack of demand, on the whole. For workers. Every report on industry prepared by The Financial Post for its "Production for Progress" series bears this out. Uniformly, the production bottleneck is labor. Peak of civilian employment during the war (in late 1941, at a time when civilian production had been cut to the bone) was 2,067,000 men and women; 21% of the total population of working age. By mid-1943 war work drained off not but 1,710,000 civilian workers; 19% of all adults.

By this spring, civilian employment had climbed back to 1,905,000, but it was still only 21% of the working force, and civilian industry was still crying for labor. Important to remember is the fact that the plants whose workers are listed under "direct war workers" for statistical purposes include many who will by no means be shutting up shop; automotive plants, for instance, who have just received a complete green light on production, whose plans for the future are expansive, whose product is urgently needed. These of other plants are in this category, many of whose workers, without receiving a lay-off notice, will go home from work one night and the next morning come back the next morning as peacetime producers.

Agriculture used to account for about 15% of Canada's working force, and the drain from that source for war industry and the forces has been vast. In late 1939, 1,225,000 Canadian men were employed in farms. At war industry's peak, that total was down to 985,000. Even by this spring, it was only back to 1,050,000—11.7% of the adult population.

Unfilled when employment conditions were last reported in the Labor Gazette were 32,571 jobs. More than 10,000 of these were in war industry plants. V-E Day had meant a sharp scaling down in demand in specific war industries; but that demand had been met by the industry's peak, that total was down to 985,000. Even by this spring, it was only back to 1,050,000—11.7% of the adult population.

Unfilled when employment conditions were last reported in the Labor Gazette were 32,571 jobs. More than 10,000 of these were in war industry plants. V-E Day had meant a sharp scaling down in demand in specific war industries; but that demand had been met by the industry's peak, that total was down to 985,000. Even by this spring, it was only back to 1,050,000—11.7% of the adult population.

Quinine was isolated for the first time in 1820.

### Hope For Cripples

Re-education Of The Muscles Through Will Power

It takes courage and patience to be a cripple—to spend long weary months, even years, in bed and yet be sure life is still good.

It is upon such courage and patience that Martin Berry of the Berry Institute at San Carlos, Calif., must depend when he undertakes to teach a child-victim of poliomyelitis to walk again, or when he coaxes a former athlete, paralyzed by a back injury, to leave his wheelchair.

Four months ago Berry went to Vancouver to organize Canada's first School of Physical Re-education. He came at the request of Dr. G. E. Strong, prominent Vancouver physician, whose daughter Barbara had suffered a broken back which left her unable to walk. The young woman had shown marked improvement after two months at the Berry Institute.

Mr. Berry, a graduate in physical education from the University of Southern California, is the son of Milton Berry, originator of the Berry Method and founder of the Institute 20 years ago.

The Berry method does not make use of the swimming pool, massage and electricity treatments so popular among physiotherapists. It is a re-education of the muscles through will power. Through the Berry method necks, spines and legs are straightened by weakening the strong muscles and strengthening the weak.

The patient through repeated efforts learns to localize the power in a particular muscle or set of muscles without bringing into play the opponent muscles.

Mr. Berry hopes to train others in the work he is doing and eventually to establish other physical re-education schools throughout Canada.

What he is striving for above all else is to get his students—who he never refers to as patients—away from the idea of thinking that they are sick and if they stay in bed long enough they will become well again. He doesn't guarantee "cures," he says. "The best we can do is help them so they can lead as normal a life as possible when existing conditions."

The school in Vancouver now has eight students, including a twelve-year-old girl, victim of spastic paralysis, and a former provincial policeman and British Columbia soccer star who was paralyzed from the waist down following a back injury. One of the students, who had not walked in more than two years, took her first step after a few weeks of classes. The step was slight and barely visible but gradually the feeding is returning to her leg muscles. In time, with patience and steady practice together with the constant encouragement of Mr. Berry, she will walk again one day unassisted.

So successful were the results at the school that a month ago the federal department of veterans affairs engaged Mr. Berry to conduct classes at Shagnessy, Veterans Hospital, Vancouver, for the returned men paralyzed by injuries they suffered overseas.

"It is early to look for tangible results, but they are very hopeful," said Dr. F. C. Bell, commanding medical officer at Shagnessy. "Meanwhile the new activity is already bolstering the morale of these returned men."

### Might Be Possible

Idea Of Atomic Engine For Aircraft Is Not Fantastic

Scientists of the National Advisory Committee for Aeronautics and that an atomic engine for aircraft is a distant possibility. They said it is not fantastic to visualize a fuel supply the size of a brick with sufficient power to fly around the world in 24 hours. The need for large gasoline storage, the N.A.C.A. said, "the payloads of commercial aircraft would be greatly increased, and the kerosene which provides essential to supersonic craft could be constructed with needed strength of solid light metal. Release of atomic energy promises to yield, and hence the application of air transport to the world's extension of communication and business, and not be limited merely to destructive uses."

### TRAVELS FAST

An observant man says that most garden things take from thirty to forty days to mature, but a turnip planted at a backyard in the neighborhood in an hour.

And, sometimes, less.

PRINCE MAY BECOME REGENT—Possible regent of Japan, if Emperor Hirohito abdicates, is Prince Noruhito-Takamatsu, his brother, seen here with his bride on a visit to Canada in 1931.

### A Valuable Asset Messages Were Found

Farmers In Canada Are Urged To Raise More Sheep

Relatively speaking, Canada has few sheep for a country of such vastness and in comparison with the thousands of livestock. We have a mere 3,500,000, which is no more than we had 25 years ago. The small British Isles have around 30,000,000, and Australia about 115,000,000.

A strong appeal for the production of sheep was made by Dr. E. S. Archibald, director of Canada's experimental farm service, at the recent meeting of the wool growers' association. He attributed Canada's lack of progress to poor indifference to lamb and mutton and to the value of Canadian wool, the breeding of the wrong types, and too much emphasis on sheep as a mere sideline, useful in wool control and as animal scavengers.

There are, however, hopeful aspects. Western farmers have found during drought spells that sheep were a valuable source of income, keeping many farmers off relief. From the standpoint of economical use of grasses, the minimum requirement of winter stored roughages and the minimum amount of labor, sheep have a definite advantage over all other animals. And in terms of commercial fertilizer for pasture improvement sheep save heavy investments. They can make a living on land that is of very little use. A co-operative sheep producers association at Vei Marie, Saskatchewan, two years ago took over 50,000 acres of land that was chiefly used by wild horses, and have already paid off their original indebtedness.

Dr. Archibald is opposed to the small flock system for such reasons as that they require little attention and feed. They are not properly looked after and the result is poor quality all round. He favors going in for sheep breeding on a larger scale, and is of opinion that with organized cross-breeding, sheep are a valuable asset to the farmer and to the country. St. Thomas Times-Journal.

### TAKE THEIR PICK

Household shortages, the consequence of almost every community in Canada, don't mean a thing to Depot Harbor, Ont., six miles from Parry Sound on Georgian Bay. Once a busy port with 400 inhabitants, it now has a population of 115 who have a choice of 100 houses. Actually only about 20 are occupied, leaving 80 vacant.

If the highways in the United States were laid out end to end in a single long line, there would be a filling station for each mile.

## Settling The Many Difficulties Confronted By Occupying Forces In Liberated Areas Is Some Task

(From the review of foreign affairs by Foreign Secretary Bevin in the British House of Commons)

POSSIBLY the worst situation of all has arisen in the occupied countries which have now been liberated. Here you have two great difficulties: One is that all people in these countries have been taught to disobey, to oppose the authority of the occupying forces. Resistance has been the watchword.

### Discovered By Accident

Hint Given By Frechman Started Study Of Radio-Activity

Uranium, the metal disclosed as the vital element in the manufacture of atom bombs, is similar in appearance to the metal of a five-cent coin. In less than half a century uranium has figured dramatically in two discoveries momentous in their importance to mankind. The first was the discovery in 1895 by Pierre and Marie Curie of radium, later to be used as a healing agent. The second is the destructive weapon the use of which was announced recently.

Uranium does not come from the earth in pure form, but is extracted from pitchblende, a black mass, or from a yellow material found in sandstone. Uranium was described in 1789 by Martin Heinrich Klaproth, the German chemist. Uranium's radioactivity, its property of radiant energy, that it was discovered in 1896 by Henri Becquerel, a French physicist.

Becquerel's discovery, which initiated the study of radio-activity and opened an entirely new avenue of scientific approach, was made by accident. The physicist left a photographic plate, wrapped in black paper, near a quantity of the fluorescent uranium. When he later examined the plate he found that a distinct impression had been produced upon it. The Curies pursued the hint given by Becquerel's discovery and emerged from arduous experiments with radium.

Pitchblende deposits are to be found in the United States in Connecticut, North Carolina and Texas, and there are carbonate deposits in Colorado. Pitchblende is also found in Canada, England, Austria, Russia, Sweden and Norway. Both metals doubtless occur in other parts of the world in deposits not yet discovered.

The uranium salts are used also in coloring porcelain and glassware yellow, orange, brown and dark green. Uranium is used as well in photography and in alloying steel for the manufacture of high-speed tools.

Uranium 235, used before the war as the basis for atomic explosives, is a rare metal differing from common uranium in atomic weight. However, 235 was the only uranium found before the war which would split into nearly two equal parts when bombarded with neutron rays. Otherwise 235 is no different from industrial uranium.

### Has Place In History

Prime Minister Attlee Pays Glowing Tribute To Winston Churchill

Prime Minister Attlee in the British house of commons, said:

"I think it is fitting that I should pay tribute to one of the main architects of victory . . . in the darkest and most dangerous hours, the nation found in Mr. Churchill the man who expressed supremely the courage and determination never to yield which animated all the men and women of this country. In undying phrases he crystallized the unspoken feelings of all."

His place in history is secure, and although he is no longer at the head of affairs when final victory has come, it really was the outcome of plans made long before under his leadership. History will link the name of Winston Churchill with that of another great leader of democracy, the late President Roosevelt. One is present with us today. The other did not live to see victory, but his service to the cause of freedom this country can never forget. . . .

### Magna Carta

One Of The Two Original Copies Presented To The British Museum

One of the two originals of the Magna Carta, the document which has been presented to the British Museum by Miss M. T. Elliot. The other copy is preserved at Durham.

A beautiful document, the Magna Carta copy shows the Magna Carta in its final form, as it still appears on Britain's statute books, and contains the representation of the charter in the museum.

### PENCILIN

By Order in Council (Canada Gazette August 14), all applications for injection purporting to contain penicillin or its derivatives must be marked with the potency of the penicillin. This sign of a terrore put up in capsules, tablets, pills, cachets, lozenges or other similar dosages, the penicillin content must be stated.

The result of this has been lawlessness and now that these countries are liberated it is extremely difficult to bring back a general acceptance on law and order, as a natural thing.

Secondly, there have been constant appeals to the people to produce as little as they could in order to help the work of occupying forces and now suddenly they are asked once again to produce the habits of work, energy and discipline. This transition from one state of affairs to another will need tolerance, patience and understanding.

Yet another problem is presented by the movement of millions of people from their homes as forced and slave labor. Thousands of these people, now known as displaced persons, since the liberation have become almost as nomads, wandering about carrying their belongings and the habit of murder and rape, and indulging in all kinds of practices of an anti-social character.

In addition to that, in Central Europe there are millions of displaced Germans wandering or endeavoring to wander from one place to another, their homes gone, and the settlement of this vast population running into millions will tax all the genius and ability of those operating the control commission.

### Again On Display

Famous Picture In Milan Convent Escaped Destruction By Bombs

One of the most famous pictures in the world, Leonardo da Vinci's "The Last Supper," may again be seen in Milan after having been hidden during the war by the nuns of a convent supported by steel scaffolding.

Announcing that the fresco was on view in the convent of the Church of Santa Maria delle Grazie, the Allied commission revealed that only one section of it had suffered from bombing in a space four inches square on the wall of St. James the Greater. The plaster has turned to dust underneath a thin hub of swollen plaster surface.

The swollen portion is not part of the original plaster, however, since that section of the fresco has undergone restoration several times. "The Last Supper," which was painted in 1494-1495, is on the end of the wall of the convent's refectory. The wall and the roof were destroyed by bombs in August, 1943, and the work of strengthening the wall will soon begin.—New York Times.

### Coy Curlylocks

7210 by Alice Brooks

Love at first sight results when a lot of spics this rag doll. She has floppy arms and legs and yarn curls tied as a permanent.

You'll need a pile of dolls for gifts this year. Now's the time to start—find in Mr. Churchill the man who expressed supremely the courage and determination never to yield which animated all the men and women of this country. In undying phrases he crystallized the unspoken feelings of all."

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg, Newsworld, 170 McEwen Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

MANY WOMEN DOCTORS Almost 500 women doctors have been serving for some time with the Royal Army Medical Corps in the United Kingdom, on the continent of Europe, in Italy, the Middle East, East Africa, and India. Fully commissioned, with the rank, pay and privileges of their male fellow officers, they have been performing all regular army medical duties with the exception of front-line combat service and field ambulance duties.

## CONGRATULATIONS, OLDS!

Ratepayers of the Town of Olds are to be congratulated on their splendid support of the water and sewage by-laws, which passed with an overwhelming majority when the vote was taken last Monday.

With this approval the Council of the Town of Olds now has a clear mandate from the citizens to proceed immediately with the installation of this greatly needed public utility and when completed and in operation the water and sewage system will provide our northern neighbor with some of the comforts of life which are a desirable feature of any community.

The advantages to Olds will be numerous. In the first place it will rid of its out-dated scavenging and disease-spreading system of sanitation, which cost the town considerable money each year with no returns. Now all money paid out for this work can be put into permanent sewage for present and future generations.

Then, too, property in Olds will be increased in value for re-sale, should a citizen desire to dispose of his home or business. Fire insurance will be lowered following the installation of a first-class hydrant system; and the Town of Olds will be well on its way to its status of a city.

It's surprising the advantages a water and sewage system can give to any town, and we in Didsbury can advance with Olds if we go ahead immediately with the plan, now approved by our Town Council, of providing water and sewage in the Town of Didsbury.

## NEW VARIETIES OF GRAIN ARE IN THE MAKING

(By H. G. L. Strange)

Many new varieties of wheat, oats, barley, peas and flax are in the making, and as soon as they have proved by test that they are up to the required high standards of quality they will be released and made available to our farmers. I have just seen many hundreds of plots of new crosses and selections growing in controlled test plots at the various Dominion Experimental Farms, at our Prairie Universities and at the Dominion Rust Research Laboratory. I have seen varieties which hold the promise of being earlier in maturity, stiffer in the straw, larger kernelled, more resistant to rust and other diseases, and some wheat selections even resistant to sowflies.

It was an inspiring and remarkable sight, and was a glowing tribute to the splendid system of plant breeding we have designed, and are using, in Canada to produce constantly newer and better varieties for the benefit of our farmers.

All of us already owe a great debt of gratitude to our talented plant breeders for the production of superior varieties now in common use. This debt will be greatly increased in the future when some of the even better varieties have finally proved themselves and are licensed and released. In a few years, I confidently predict, we will see new varieties that will reduce costs of production and make farming less hazardous.

## POTATO PRODUCTION

Production of potatoes in Canada is estimated at 42,600,000 hundredweight as compared with 40,400,000 hundredweight last year. Average yields per acre in Ontario, Manitoba and Saskatchewan are slightly higher than those of last season, but yields in the Maritime provinces and Alberta are considerably below the 1944 level.

## SEASONABLE REDUCTION MOTOR CAR LICENSES

First reduction in motor licenses in Alberta this year will take effect October 1, when there will be the usual 40 per cent cut in the annual license fee, according to information received by the Alberta Motor Association.

In the case of cars which were manufactured in 1935 or in earlier years, the reduction will be 50 per cent of the annual fee.

Through the lifting of wartime restrictions on gasoline, it is expected that there will be a spurt in applications for new licenses this fall. Many owners who have had their cars out of operation for the duration intend to have them in service from now on, providing weather conditions are satisfactory.

On January 1, the reduction in the annual license fee will be 75 per cent, which is the usual decrease at that time for those who wish to operate their cars for the last three months of the license period, from January 1 to March 31.

## FOOD SHORTAGE AHEAD.

The people of Canada have been fortunate in that food production was at the highest level in history during the war years. The Ontario Federation of Agriculture issued a statement a short time ago pointing out that this condition was liable to end, and predicting that even with all the possible help in the production program in the next nine months Canadian people will feel the food shortage as they have not done before.

## CATTLE MARKETINGS

Cattle producers are following the advice of the federal department of agriculture to market their cattle early. Inspected slaughterings for the week ending August 30th reached about 40,000 head, a record exceeded only once before in the congested week of December 9, 1944. If heavy marketings continue up to October there will be less danger of marketing congestion later on in the year.

## MEN FROM THE ARMED FORCES FOR FARMING

Any personnel in the Armed Services, wishing to be released for farm work at any period of the year, should now be advised to:-

- Apply to their Commanding Officer for release for farm work, stating past farm experience, giving reasons for request.
- Give location, type and size of farm, wherever possible.
- If possible, submit a letter from a parent or former farm employer and a letter from municipal or other official in home locality, indicating need for services.

Agricultural Labour Survey Committees have been set up by the Federal Department of Labour, to co-operate with the Armed Services in the release of men for farm work.

These Committees represent the Provincial Department of Agriculture, the Armed Services and the National Employment Service. They are prepared to advise farmers or Service personnel on any problems concerning such releases. For further information write your Agricultural Labour Survey Committee, care of Mobilization Registrar, at Charlottetown, Halifax, St. John, Quebec, Montreal, Kingston, Toronto, London, Port Arthur, Winnipeg, Regina, Edmonton, or Vancouver.

## WARN MOTORISTS OF DEADLY MONOXIDE

Deadly dangers of carbon monoxide give cause for fresh warning to motorists at this time of the year. Recently there have been reports of deaths in different parts of the country from these poisonous fumes. In one instance deaths of two car occupants were reported.

More old cars are now appearing on the highways, due to the abolition of gasoline rationing. That condition probably will prevail for some time, which calls for extra care.

Car experts advise that every car be taken to guard against carbon monoxide. When starting the car up in the garage now that cold weather can be expected, make sure that at least one window is open to permit the flow of fresh air. Have the car checked over for any defects and thus check any poisonous fumes. Guard against deadly carbon monoxide in every way possible and reduce the death toll.

## LIFT CONTROLS ON SHEETS AND TOWELS

Simplification controls which set maximum widths for hems on pillowcases and sheets, and maximum sizes for sheets, towels and pillowcases, certain types of curtains and bath mats, have been cancelled, the Wartime Prices and Trade Board announces.

Conservation effected by the simplification controls was not sufficient to warrant their extension, the Board officials said. Although

## MOST OF US DON'T KNOW

Hardly anyone—not even the publisher—knows how important a newspaper is to a community.

The smaller the town, the more important the newspaper is in its economic life. Its news, editorials and feature stories focus the interest of surrounding territory on the place in which the paper is published.

This force and the force of advertisements by local merchants build an ever-widening trade area. This means more business, more money for schools, homes and churches—a bigger and better town.

A town with a newspaper is a town with a future. The better the paper, the brighter the future.

It deserves the support of every business man in that town.

We are trying to make this paper worthy of our town. Your help and suggestions are appreciated.

## DIDSBURY PIONEER

A Newspaper is More Than a Business—It is a Community Institution

FORTUNE SMILED SUNNIEST  
SMILE ON THIS PROVINCE

Alberta is, indeed, a most fortunate province.

Its climate is comparatively mild in both summer and winter, and is suitable for the growing of virtually every food essential to man. More than 50,000 of its 255,000 square miles are covered with dense stands of forests to provide building materials for man's protection.

Its tremendous coal reserves provide not only heat for domestic but for industrial purposes. Its mighty mountain ranges with their mighty perpetual glaciers ensure an ample supply of pure water for irrigation, the development of power and other uses. Untold supplies of natural gas and oil underlie extensive portions of the province. There is an ample supply of building stone, clays for pottery, salt and other natural resources such as the fabulous oil sands of the Athabasca river region.

Alberta's broad fertile plains are capable of growing large quantities of grains and vegetables either for food or for food products, such as sugar and vegetable oils. Extensive tracts of Alberta's treeless prairies are suitable as pasture for vast herds of cattle and flocks of sheep. Her parkland areas are especially adapted to mixed farming, dairying and poultry raising.

Considerable quantities of fish from Alberta's cold northern lakes are marketed regularly in places as far distant as Chicago and Boston. Furs from the northern forests are always in demand in the leading markets of the world.

Alberta is also fortunate because so much of her territory is still much as it was before the white man came. Here, deep within the age-old forests, by beautiful lakes

and along the banks of clear, rushing streams and rivers, elk, moose, deer, caribou and mountain sheep and goats together with forest bird life exist as they did a thousand years ago and near the shores of thousands of northern lakes innumerable waterfowl make their summer homes and hatch their broods year after year.

Neither is Alberta devoid of inspiration-building grandeur. Her magnificently majestic mountains, the freedom of the open air, the carefree days of summer or winter pastimes among her peaks or in her verdant valleys have restored man a tired soul, rekindled many a forlorn hope and revived many lofty ambitions. Alberta, with all her material blessings, has also those cathedrals of stillness, built without hands, from which cultural and spiritual greatness grows.

## NO JEEPS—NONE LIKELY

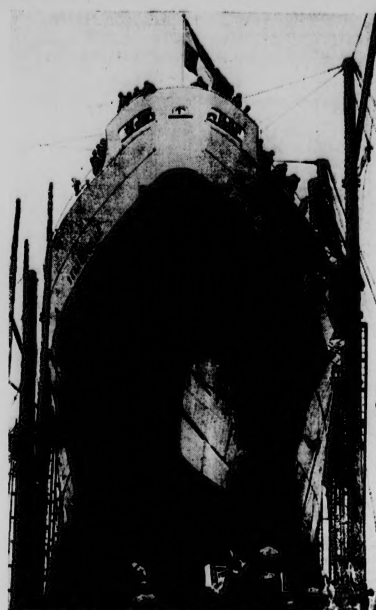

Plagued by tens of thousands of requests, War Assets Corporation came out recently with these salient facts in relation to itself and the jeep:

1. We have no jeeps for disposal.
2. We have never had any.
3. We don't expect to have any for a long time, if ever.

By phone, letter and the spoken word, tens of thousands of citizens have been harrying the corporation with requests for jeeps to be put into civilian use.

The corporations charged with ridding Canada of her excess war materials, can only say its three lines, point a finger at a certain motor car concern that plans a civilian-versions jeep soon and advises them "Try them". —Montreal Gazette.

**RATIONED MEAT IN LOCKERS**

*must be declared*

All consumers who store rationed meat in lockers must declare in writing to the nearest Ration Branch Office the quantity of rationed meat they had in storage on September 10, 1945.

Rationed meats include all cooked, canned, fancy and "red" meats. For a full list of rationed meats, see the Consumer Meat Coupon Value Chart. Copies are available at all Ration Branch Offices.

## COUPONS MUST BE SURRENDERED FOR STORED MEAT

Consumers must surrender coupons for all meat held in lockers over and above 4 lbs. for each person in the household at a rate of 2 lbs. per coupon. However, no more than one-half of the "M" coupons in the ration books of the consumer and his household need be surrendered.

## USE THIS DECLARATION FORM

## END OF CONTROLS NOT IN SIGHT

We are a free people, and we hold dear the right to run our lives in accordance with the dictates of our wishes and our conscience. But hand in hand with freedom has come the realization that the dictates of our wishes must be subordinate to the job of holding this freedom.

Canada has done a tremendous job. The figures, when considered along with the population total of the country, are not encouraging, and they are heartening.

And now the war is over, and we are looking forward to a relaxation of some of the controls that are necessary to a war economy. But we are finding that we can't relax all of them immediately.

"It has been stated repeatedly," says Hon. Humphrey Mitchell, Minister of Labour, "that there must be an orderly relaxation of controls as quickly as circumstances permit, and the time has arrived to relinquish additional controls. This is subject only to avoidance of endangering vital industries, such as home building and those which may be absolutely necessary to bring about efficient re-establishment of returning veterans and transfer of war workers to ordinary occupations."

The principal controls on labour which still remain in effect include two which have a particular bearing on agriculture. One of them says that men may not leave employment in production without permission of an employment office during the present busy season on the farm. This will be eliminated after the 1945 crops are harvested. The tentative date for the removal of this control is November 15.

The other control which particularly applies to farm people, says that employment offices may direct male persons from 18 to 65 years of age to work at agriculture, fishing and a few other basic industries. This control will be relinquished sometime about November 15.

The need of these controls is pretty obvious to all of us. The end of the war has not obliterated the necessity of seeing to it that the people of liberated countries have food. The wheat fields of Canada are going to be a tremendous help to these people, and so is the meat and the other necessities of life that we produce.

So, you see, we have peace but there is still a wheel to which we must put our shoulders. Let us do it willingly.

Uncle Jed says that giraffe makes live off the fat of the land.

## THORNY PROBLEM

A problem of considerable interest regarding the attention of the Division of Animal Pathology, Science Service, Dominion Department of Agriculture, is the possibility of certain parasites being carriers of swine virus. While in most parts of Canada the infection is easily controlled when appropriate methods are used, the control in a few sections from time to time has not been easy. Consequently the suspicion was prompted that in these areas some form of life other than the pig carries the virus over long periods of time. A survey of these districts was undertaken and it was found that the thorny head, a worm, a parasite which affects the intestines of pigs and passes part of its life cycle in the June bug was present only in these regions. An experiment has been set up, says the animal report of the Science Service, with a view of determining whether swine fever virus can be carried through the life cycle of this parasite. The experiment is proceeding.

LOANS to Purchase  
PURE BRED  
LIVESTOCK

THE QUALITY of the livestock on your farm can be improved in relatively few years through the steady introduction of selected individuals of good blood lines. Should you wish to buy young pedigreed stock or mature animals of superior breeding, The Royal Bank of Canada will be glad to lend you cash for the purpose.

Under the Farm Improvement Loans Act, 1944, loans are available on most attractive terms for the purchase of foundation or breeding livestock, for machinery, equipment, farm electric systems, the construction and repair of buildings and other purposes. Repayment may be arranged by convenient instalments and the interest rate is low. We welcome your enquiries for farm loans.

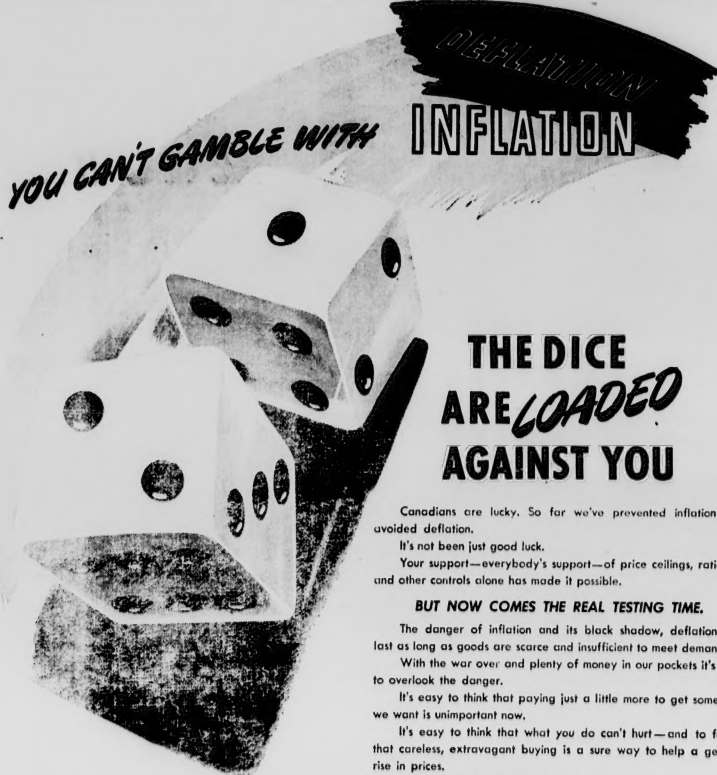

## "FARM IMPROVEMENT LOANS"

This is the title of our new booklet which describes in detail the many attractive features of Farm Improvement Loans... what the money can be used for... method of repayment... and the new types of security which can now be accepted by the Bank. Ask for a copy at your local branch.

THE ROYAL BANK OF CANADA

If you have anything to sell, Try a Classified Ad!

Canadians are lucky. So far we've prevented inflation and avoided deflation.

It's not been just good luck.

Your support—everybody's support—of price ceilings, rationing and other controls alone has made it possible.

## BUT NOW COMES THE REAL TESTING TIME.

The danger of inflation and its black shadow, deflation, will last as long as goods are scarce and insufficient to meet demands.

With the war over and plenty of money in our pockets it's easy to overlook the danger.

It's easy to think that paying just a little more to get something we want is unimportant now.

It's easy to think that what you do can't hurt—and to forget that careless, extravagant buying is a sure way to help a general rise in prices.

That's how inflation gets going.

## BUT INFLATION IS ALWAYS FOLLOWED BY DEFLATION.

And deflation brings cancelled orders, bankrupt businesses, mortgage foreclosures, unemployment and distress—distress you can't avoid.

Until industry gets back to normal, price ceilings, rationing and other controls are our safeguard.

**SO—** Keep on watching your buying. Don't rush to buy scarce goods. Keep on saving your money. Put it into Victory bonds and War Savings certificates. Keep on supporting wage and price controls, and rationing. Keep on fighting inflation and its black shadow... deflation.

This advertisement is one of a series being issued by the Government of Canada to emphasize the importance of preventing a further increase in the cost of living now and deflation and unemployment later.

Priority certificates for the purchase of new trucks are now available at local offices of the Wartime Prices and Trade Board.

Previously application to the regional office, Edmonton, was necessary to obtain a priority certificate. Local offices of the Prices Board are situated in Calgary, Lethbridge, Medicine Hat, Red Deer and Grand Prairie.

**NEW BRITISH SPEED CAR**

Lieutenant Robert Morgan, a British Fleet Air Arm Officer, has after six years of research work, completed the plans for a new type of car designed to raise the present world speed record of 368 miles to 520 miles per hour. The invention represents a revolutionary novelty in design and construction of cars. The car consists of a gigantic wheel approximately 12 feet in diameter, which contains the driver's seat and has a pear-shaped body which is largely made out of a special glass and light metal. The car, which the inventor has called the "Bomb" is jet-propelled. It uses liquid gas as fuel, and works almost on the same principle as the German V2 rocket.

**TEA IN TABLET FORM**

The London "Union of Ceylon Tea Planters" have recently received the first "tea tablets" which should considerably simplify and cheapen the production of tea. They are the result of a process based on long years of experiments carried out by the Research Institute, which reduces the time required in producing tea from 24 hours to 2 hours. By means of this process the tea is made into compressed tablets which saves shipping space. The tablet-form tea is also about 50 per cent stronger than tea in its present form, and allows for a reduction in price.

**SHORTAGE OF OATS AND BARLEY**

A.M. Wilson, Field Crops Commissioner stresses the importance of making immediate arrangements to satisfy feed and seed grain needs and farmers who must purchase oats and barley for feed or seed should make provision for their requirements without delay. If arrangements to obtain these grains are not completed at an early date, serious difficulties in obtaining the required amount may later be encountered.

Feed grains are in urgent demand for shipments to many parts of Canada and for export to other countries. To meet this demand the quantity of grain in elevators and on farms is relatively small. Yields of the current crop will be considerably below normal. In consideration of the supply of feed grains available and having in mind the unlimited demand for shipment of these grains elsewhere, farmers who need seed and feed must make provision for their requirements immediately or face the possibility of serious shortages at a later date.

**HIGH QUALITY BACON**

The manufacture of Canadian export bacon has been standardized to a high level. A staff of inspectors at the Canadian seaboard work under the Meat Board, Dominion Department of Agriculture, and sample each shipment from each packing plant. Reports are made covering grading, workmanship, condition, and weight. This information is relayed to the packers, and in certain cases penalties are applied. Further, a bacon specialist visits each plant periodically to check on workmanship and method of processing. Much attention is also given to refrigeration of railway cars and ocean vessels, as well as to the handling at the docks, in order to assure the arrival of the bacon in the United Kingdom in the best condition.

**FARMERS COLLECT COUPONS FOR MEAT**

Under meat rationing regulations this time, there will be two changes affecting farmers who slaughter meat for their own and farmer

neighbor's consumption, the Wartime Prices and Trade Board has announced. Farmers will have to deposit monthly at the Local Ration Board, coupons covering meat consumed in their own household, and sales to farmer neighbors, at the rate of 4 lbs. per coupon. To allow variety in diet, no more than half the valid meat coupons in the farmer's household ration books need be deposited.

**CANDY FROM CUBA**

Hardy candy from Cuba, Mexico, Argentine and other Caribbean Latin American countries will be reappearing in Canada for industrial use and on store counters following increased imports of this product through the medium of the Wartime Prices and Trade Board.

**NOTICE TO CREDITORS AND CLAIMANTS**

IN THE MATTER OF THE Estate of THOMAS ANDERSON MURPHY, late of Didsbury, in the Province of Alberta, Farmer, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named, Thomas Anderson Murphy, who died on or about the 19th day of May, 1944, are required to file with the undersigned by the 20th day of October, A.D. 1945, a full statement, duly verified, of their claims and of any security held by them, and that after that date, the Executors will distribute the assets of the deceased amongst the parties entitled thereto, having regard only to the claims of which notice has been so filed, or which have been brought to their notice.

DATED at Didsbury, Alberta, this 4th day of September, A.D. 1945.

W. A. AUSTIN,  
Didsbury, Alberta,  
Solicitor for the Executors.

Who ever thought  
Synthetic Tires  
could be SO good!

A while back, many motorists wondered about new synthetic tires. Were they dependable? Would they give good mileage? The answer is "yes" if they are Dominion Royal. Never was any tire engineered so perfectly to get the best performance out of synthetic rubber. If you are eligible for new tires we recommend Dominion Royal.

Mr. Bert Cook of Jenkins Groceria spent last Wednesday in Red Deer.

—K. Roy McLean, optometrist, will make his next visit to Didsbury at the Rosbud Hotel on Monday, October 1st, morning only. Wednesday to Saturday consult at 115 Southern Building, Calgary.

Mrs. E.M. Rodney is improving in health the last week.

—Mrs. Gulliver will commence her piano classes Saturday, September 22nd, at the home of Mrs. Morton (Mrs. Sexsmith's home).

Miss Joyce Morgan has been appointed marriage license issuer at Didsbury.

Word was received in Didsbury Tuesday that Mrs. H.J. Harder had passed away Monday evening, Sept. 17, in hospital in Ontario.

Miss Doreen Gillrie entertained a number of her friends at a jolly party at her home last Thursday evening in honor of Miss Adeline Buhr, who has come to Calgary.

The evening was spent in playing cards and a delicious lunch was served. Miss Buhr was presented with a purse of money.

Flying Officer A. Buhr returned last Saturday after operational duties in the East.

Flying Officer Dalton Deadrick arrived home Monday from Trenton, Ontario, by motor, stopping over in Minnesota to visit relatives. He plans to enter University of Alberta this coming term.

Ralph Edwards and Miss Joyce Mertens of Calgary were Didsbury visitors Monday.

## EVANGELICAL CHURCH NOTES

"The Incarnation of Christ" will be the theme on Sunday, September 23rd, at 10.30 a.m. The hardest pronouncement the infidel crowd has ever run up against is to account for Jesus Christ. The main prove that Jesus is the Son of God, Sunday School will be held at 11.30 a.m. and at 2 p.m. Church service at 7 p.m.

"Reformation" will be the theme at the 7.45 p.m. service. We have been bought with a price, which is Christ's blood shed upon the cross. Come and worship with us.

## EVANGELICAL

STANDARD TIME CHANGE  
EFFECTIVE SEPTEMBER 30

Canada will revert to standard time Sunday, September 30. State Secretary Martin announced last week in the Commons at Ottawa. The clocks will be moved back at 2 a.m. local time.

## HONOR SHIRLEY LIESEMER

A number of the school friends of Shirley Liesemer held an enjoyable hike and wicker roast at the "racks" last week in her honor. At the close of the evening she was presented with a gift. Shirley left to attend Western Canada High school, and will be greatly missed by her friends.

## DIDSBURY HOSPITAL BIRTHS

Born to Mr. and Mrs. V. Sorenson on Thursday, September 13th, a boy.

To Mr. and Mrs. R. Rodney on Saturday, September 15th, a girl.

To Mr. and Mrs. Leo Nichols on Tuesday, September 18, a girl.

The Junior W.A. will meet at the home of Mrs. M. Seroule on Monday, September 24th, at 8 p.m.

## WHEAT MARKETING QUOTA

The wheat Board announced that the wheat marketing quota at all delivery points in the three prairie provinces has been raised to 14 bushels per authorized acre. This is due to the fact that very large quantities of wheat have been moved from country and terminal elevators in the prairie provinces thus providing more storage space than has been the case for a number of years. Furthermore, the present wheat crop is a comparatively small one.

Java, in the Netherlands East Indies, has a very dense population rate: 912 inhabitants per square mile against 43 in the United States.

## WARNING TO BICYCLE RIDERS

The riding of bicycles on sidewalks has reached an epidemic stage again. This is a menace to life and limb and the Town Council is taking drastic measures to see that it is stopped. In addition to a fine the bicycle of the offender may be impounded.

Parents are requested to co-operate with the Council.

BY ORDER OF THE COUNCIL.
